

# Technical Supplement

## Back Blocking

## Using Back blocking cement or drywall masonry adhesive.

This technical supplement has been produced to provide background, clarity and approval for contractors to use either GTEK™ Back Blocking Cement or GTEK™ Drywall Masonry Adhesive as the adhesive for back blocking GTEK™ plasterboard.

**We are recommending 2 options when requiring an adhesive for back blocking.**

1. GTEK™ Back Blocking Cement
2. GTEK™ Drywall Masonry Adhesive

Both of the products provide the spread-ability and adhesive qualities required to adhere back blocks to the back face of GTEK™ plasterboard as described in the GTEK™ Wall & Ceiling Solutions technical brochure.

The BGC Plasterboard warranty applies to both products in this application.

If you have any further queries regarding back blocking please contact your local BGC state office on **1300 652 242** or through our website **[gtekplasterboard.com.au](http://gtekplasterboard.com.au)**
